

# Technology Monthly Round UP

September 6, 2016

## Oldies but Goodies Teacher pastime favorites

**Learnzillion.com** – math and language art lessons and videos

**Readworks.org** – reading passages based on Lexile Levels

**Prodigygame.com** – gamify mathematics, your students will love you!

**Quizizz.com** – create awesome multiplayer quiz games

## GOOGLE CLASSROOM FEATURE OF THE MONTH:

Now is a great time to get your students setup in Google Classroom. There are many websites that offer the “Share to” feature that directly saves to your classroom. Here is one of my favorite:

**Dogonews.com** is a great site that has fun articles for kids on current events, science, sports, and more! There are also lots of stories, pictures, videos, games all by grade level.

Simply click on the plus sign and select Google Classroom. This will automatically walk you through the steps of creating an assignment for your students.

## Other Noteworthy Features:

Add parents to Google Classroom to keep them informed with email updates and summaries:

Under the “Student” tab on your homepage you will see an “Invite Guardian” option next to each student.

## Websites by Subject:

**Math Facts: K-4th**
